18<sup>th</sup> International Symposium on Novel and Nano Materials

## Invitation

The 18<sup>th</sup> International Symposium on Novel and Nano Materials (ISNNM) will focus on the overall materials researches such as Advanced Materials Processing, Advanced Powder Metallurgy, Additive Manufacturing and Printing Technology, Computer-aided Materials Engineering, Energy and Environmental Materials, Electric and Magnetic Materials, Rare Metals and Recycling, Refractory Metals and Hard Materials, Nanoceramics. All main aspects of these materials will be covered, including synthesis, mechanism, microstructures, properties and applications. The symposium will provide the latest research results and a state-of-the-art overview of technologies in the exciting and rapidly evolving fields of materials, and also provide invited lectures by internationally distinguished scientists on those topics. Manufacture's contributions and exhibits are welcome to promote further interaction between the scientists and the industry. Registration and contributions for the Symposium in the form of oral or poster presentations are warmly invited and is open to all. Selected papers will be published in SCI journal after peer review.
